Tonnes mined increased by 2% from the previous quarter due to the ramp-up in production at Bimha Mine and a better performance at the South Pit Mine.

Tonnes milled decreased by 3% from the previous quarter due to a seven-day mill reline shutdown at the Selous Metallurgical Complex concentrator.

4E head grade was maintained at 3.24g/t.

The furnace, which was switched back on in October 2017 after a successful planned 46-day sidewall reline shutdown, smelted 32 009 tonnes of concentrate, up from 22 654 tonnes smelted in the previous quarter.

Overall, 4E metal production in final product decreased by 2% from the previous quarter mainly due to the decrease in the volume of ore milled.

Concentrates produced and stockpiled during the furnace shutdown in the previous quarter were exported during the quarter under review.

Revenue increased by 80% from the previous quarter mainly due to the sale of concentrates accumulated from the previous quarter and a 4% increase in the basket price of the metals sold.

Net operating costs increased by 84% compared to the previous quarter largely due to the increase in 4E sales volumes, an increase in selling expenses arising from the export of concentrate stockpiled in the previous quarter and an increase in smelter costs in line with increased running time.

Royalty and commission expenses increased by 76% from the previous quarter in line with the increase in revenue.

Cash cost per 4E ounce increased by 15% from the previous quarter despite the increase in production volumes mainly due to selling expenses and smelting charges for the concentrates produced in the previous quarter but only exported during the current quarter.

Gross revenue per 4E ounce increased by 4% from the previous quarter due to higher metal prices. Net cash cost per 4E ounce increased by 17% from the previous quarter due to the increase in operating costs and a decrease in by-product revenue per 4E ounce.

Total payments to the Government of Zimbabwe in direct and indirect taxes increased to US\$19 million from the US\$16 million reported in the previous quarter.

The average platinum, palladium, rhodium, gold and nickel prices realised were as follows:

RESOLUTION OF OUTSTANDING ISSUES WITH GOVERNMENT

Indigenisation and economic empowerment

Discussions with the Government of Zimbabwe regarding the operating subsidiary's indigenisation implementation plan are continuing.

Acquisition of a portion of the mining lease area

As reported previously, on 13 January 2017, the Government of Zimbabwe issued, through a Government Gazette Extraordinary, a preliminary notice in terms of which it gave fresh notice of its intention to compulsorily acquire land measuring 27 948 hectares within the operating subsidiary's special mining lease area. The operating subsidiary lodged an objection to the proposed acquisition. Following the objection being lodged, on 24 May 2017, the Government served the operating subsidiary with an order of compulsory acquisition and, on 26 June 2017, the Government filed a court application seeking confirmation of the acquisition. The operating subsidiary responded to the court application. The matter is pending in the courts but the operating subsidiary is also engaging the Government on the matter.
